

Memorial Plaques Indexing Challenge

All you need to know and do in 3 easy steps.

Step 1:

Visit a synagogue and obtain permission to photograph & publish the content of the memorial plaques. Explain the **goals and scope** of the project. General information about the synagogue must be filled in the **form**.

Step 2:

Photograph each individual plaque or an entire column/section, just make sure you can read the information from the photos.

Step 3:

Transcribe the data into the **template**. When complete, send the data file spreadsheets to jowbrsubmissions@lyris.jewishgen.org as an attachment. Photos can be sent using a file sharing service (e.g. DropBox, [FiletoFriends](#) or [FileMail](#)). Visit [JewishGen](#) or contact [Nolan Altman](#) for more details or questions.

Send your local news outlet a story and photo about your success in preserving these important records.
